Cartoflex, an industry producing “honeycomb”, began its life more than 40 years ago in Motta di Livenza in the north of Italy. Ever since then, it has been manufacturing cardboard with a honeycomb structure and selling it all over the world.

During such a long period of activity, it has reached a high degree of specialisation, placing it at the forefront of the best qualified industries in the field with regard to technology and informatics, both at home and abroad. Today, Cartoflex is a modern, technologically advanced industry able to supply its customers with a reliable, high quality product, thanks to the energy, creativity and dedication of a hard-working team of people. These characteristics, together with high quality service, continue to satisfy the requirements of both craftsmen and industrialist alike, wherever they may be, keeping pace with an ever-evolving global market.

Since 1990 the company has developed to such an extent that it has been necessary to employ more staff and increase the surface area covered. In 1996 and again in 2002, therefore, the premises were enlarged in order to better organise production, warehousing and preparation of orders to be dispatched.

Today, in an environment of fierce competition, Cartoflex aims, above all, to ensure the loyalty of the customers it already has in more overstocked markets, and to penetrate emerging markets with firm determination through a new planning stage designed to guarantee 100% customer satisfaction.
