

Principal properties and advantages of Cartoflex honeycomb cardboard.

### Properties

- extremely lightweight material
- significant weight reduction of final product
- extremely high resistance to compression
- high resistance to torsion
- completely recyclable and biodegradable
- significant resistance to tension
- safe/non toxic material
- extremely easy to cut
- improves productivity

### Advantages

- significantly reduces storage costs
- lowers transportation costs
- lowers processing costs
- easy to handle and apply
- excellent price/performance ratio
- safe to handle
- environmentally friendly product
- very cheap structural filling material
- guarantees the quality of the final product
